## Key Features

### Web Enabled But Not Web Dependent

MKinsight is unique in the way it harnesses the efficiency of web based .Net functionality whilst enabling seamless offline working

### Exceptional User Interface

MKinsight is repeatedly selected for its up to date, easy to use and pleasing on the eye User Interface which makes full use of the current programming capabilities of .Net

### Unique Scoring And Trend Analysis

MKinsight provides a unique facility to automatically enable the audit team to see the emerging trend in audit results to aid in the understanding as whether or not the control environment is getting stronger or weaker over time

### Single Database

MKinsight is a FULLY integrated system working from one SQL Server database for all functionality – making day to day work and reporting simple and seamless

### Role Based Privileges

Visible and usable functionality fully tailored based on a comprehensive role based privilege system

### Fully Configurable Terminology And Workflow

In addition to highly flexible functionality ALL terminology is fully configurable in MKinsight

### Robust Development Programme

Committed and successful track record in delivering User Group requests for expansion to functionality across the system

### Complete Data Security

All off-line data (including attached / embedded documents) are held in a fully encrypted format guaranteeing data security at all times, also all data transmissions are fully encrypted

### Multi-Language

With MKinsight's global expansion it is a multi-language system with French, Spanish, Portuguese and Russian already available – additional languages can be made available with just 3 weeks notice

### New MKinsight Subscription Service

Specifically designed for individuals and small teams, MKinsight's Subscription Service can be made available through our fully secure hosting facilities at an all inclusive monthly rate

### Enterprise Risk Management Integration

MKinsight has a fully integrated Enterprise Risk Management System built in which allows Risk Managers and the Internal Audit Team to work seamlessly alongside one another
